

## CLAIMS

I claim:

1. A topical composition comprising a mixture of vismia and phytic acid.
2. The topical composition of claim 1 wherein said vismia comprises as a percent weight of said composition from about one to about five percent.
3. The topical composition of claim 1 wherein said phytic acid comprises as a percent weight of said composition from about one to about five percent.
4. The topical composition of claim 1 wherein said composition treats hyperpigmentation disorders.
5. The topical composition of claim 1 further comprising arbutin.
6. The topical composition of claim 2 further comprising arbutin.
7. The topical composition of claim 3 further comprising arbutin.
8. The topical composition of claim 1 further comprising kojic acid.
9. The topical composition of claim 2 further comprising kojic acid.
10. The topical composition of claim 3 further comprising kojic acid.
11. A method of treating hyperpigmentation disorders in human skin comprising applying the composition of claim 1 to human skin.
12. A topical composition comprising
  - a. about one to about five percent vismia and

- b. about one to about five percent phytic acid.
13. The topical composition of claim 12 wherein said composition treats hyperpigmentation disorders.
14. The topical composition of claim 12 further comprising arbutin.
15. The topical composition of claim 12 further comprising kojic acid.
16. A method of treating hyperpigmentation disorders in human skin comprising applying the composition of claim 12 to human skin.
17. A topical composition comprising:
- a. about one to about five percent vismia
  - b. about one to about five percent phytic acid; and
  - c. arbutin.
18. A method of treating hyperpigmentation disorders in human skin comprising applying the composition of claim 17 to human skin.
19. A topical composition comprising:
- a. about one to about five percent vismia
  - b. about one to about five percent phytic acid; and
  - c. kojic acid.

20. A method of treating hyperpigmentation disorders in human skin comprising applying the composition of claim 19 to human skin.
